**EXTERIOR**

1. **Front Lip Spoiler**
   - **HK$4,372.00**
   - This spoiler rectifies the flow of air from the front to the sides of the vehicle and improves driving stability. It controls the flow of air and prevents it from lifting the vehicle by diverting it towards the rear.

2. **Front Side Under Spoiler (2 Pcs)**
   - **HK$3,528.00**
   - This spoiler rectifies the flow of air into both front sides of the vehicle as well as improves driving stability. It also controls the flow of air and prevents it from lifting the vehicle by diverting it towards the rear.

**Aero Garnish (Rear Door)** (2 Pcs)
- **HK$1,952.00**
- This product rectifies the airflow from the front to the side of the body when the car is running, in order to stabilize the vehicle. It also provides a protective function in the rear end of the rear door which is prone to damage by loose gravel and other debris.

**Roar Side Under Spoiler (2 Pcs)**
- **HK$1,952.00**
- This product rectifies the airflow from front to rear by pushing the air efficiently towards the rear end. It also corrects turbulence around the rear bumper, keeping the car body stabilized and improving passenger comfort.

**Side Under Spoiler (4 Pcs)**
- **HK$4,285.00**
- This is an aerodynamic part which rectifies airflow from the front to the sides of the vehicle body when the car is moving, redirecting the airflow under the car body which acts to lift the car towards the rear of the vehicle. As a result, the car becomes more stable and the handling becomes smoother.

**Door Protector (4 Pcs)**
- **HK$520.00**
- This is a carbon-effect door handle protector which protects the car from scratches and fingerprints when opening/closing doors. Designed for grip-type door handles, not only serves as scratch prevention, but also adds a sporty touch.

**INTERIOR**

**Push Start Switch**
- **HK$3,204.00**
- Push-button ignition starter switch for models with reverse entry and push-down starter switches. The cherry red button with the STI logo in the center gives the interior a sporty look.

**STI Shift Knob, Leather**
- **HK$526.00**
- High quality tanned leather is used and a STI logo is decorated on the top of the gearshift knob. The sides are upholstered with dimpled tanned leather for a sporty finish, in piano black for a premium look.
**ALLOY WHEELS**

- **STI Alloy Wheel 18" (Gunnorma) (4 Pcs)**
  - HK$22144.00
  - STI2144E

- **STI Alloy Wheel 18" (Black) (4 Pcs)**

- **STI Alloy Wheel 17" (Gunnorma/Black/Silver) (4 Pcs)**
  - HK$18968.00
  - STI1011/1011H/1011S

These cast aluminum wheels are made using the spinning production process to form the shape of the rims. This ensures a reduced weight with increased rigidity. This design perfectly matches the new Forester body design and its colours.

**FOR ENGINE**

- **STI Battery Tower Bar**
  - HK$1202.00
  - STI1202B

  A unique battery holder reminiscent of the flexible tower bar, adds an attractive highlight to the engine compartment, in addition to securing the bulky battery.

  *Compatible with batteries with “D” as the third digit*

- **STI Engine Oil Filler Cap**
  - HK$1202.00
  - STI1202F

  This oil filler cap consists of a die-cast aluminum base that has been machined, and given a stylish resin cover. The shape of the cap has been specially designed to allow for use even when wearing work gloves. The silver aluminum base with embossed black cap showing the cherry red STI logo adds a special touch to the engine compartment.

  *A gasket is not included*

- **Performance Oil Filter**
  - HK$406.00
  - STI0406P

  This oil filter with enhanced performance thanks to its increased filtration area of 15% compared to conventional filters. With dedicated materials to improve its particle collection performance, this filter also captures fine particles such as carbon and reduces pressure loss by 10%. It is compatible with high viscosity oil, providing stable performance not only on roads but also on the circuit track.

- **STI Flexible Tower Bar**
  - HK$4720.00
  - STI4720F

  This is a strut tower bar with a new concept - splitting an aluminum tower bar in the center and connecting the two pieces with pillow ball joints. As the left and right pieces are flexibly connected, the bar can moderately handle longitudinal forces such as g's on the road to maintain ride comfort while strongly holding against lateral forces during cornering. It greatly improves cornering performance, straight-line stability and ride comfort.
