| > 1600cc    | \$83                       | \$123                        | \$58           |

Price inclusive of GST and subject to change without prior notice  
Effective Date: September 2016

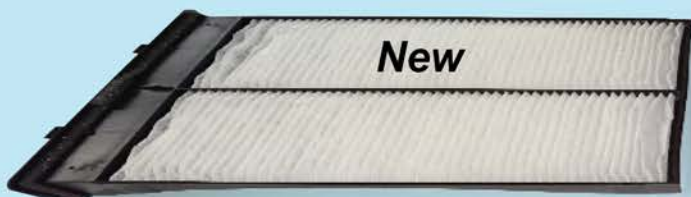

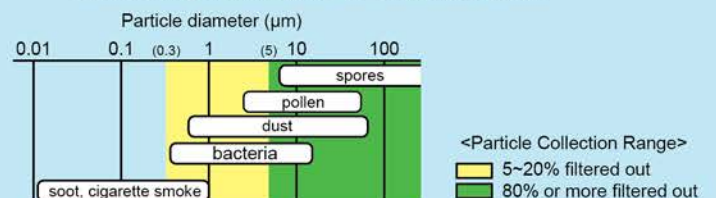

## In-Cabin Filter Ventilation Filter

### The best solution to keeping out Haze Pollutants

Dirty & polluted air can enter interior cabin even when doors and windows are closed. Motor Image Ventilation Filter is specially developed to keep the cabin air clean by filtering out unwanted particles, dust, soot & particulates in exhaust smoke.

Filtration performance of ventilation filter

Note • In the event of severely clogged evaporator, normal Odor Buster treatment may not completely remove the accumulation of foreign particles & deposits. We recommend further servicing of air-con evaporator where renewal of parts may be necessary. [i.e Additional Parts & Labour charges]
